- @gmail.com | www.linkedin.com/in/aamez-sayed-1b1924169 | +91 8149507962 / 7028185038

- **1 year** of experience in Hybrid Andoid/IOS application development(Ionic 4/5), Web application development(MEAN), Angular, nodejs, mongodb, AWS integration, testing, maintenance and deployment.
- **6 months** of experience as an intern in web development(PHP) using LAMP stack and WordPress
- Effective and efficient communication skills, Problem solving and technical skills with ability to work independently and also in a team
- Evaluating end-user requirements, custom designing solutions, troubleshooting for complex information and performance tuning systems management.
- Developing web and android application

Skills & Technologies

- **Programming Languages** : JavaScript,TypeScript, C
- **Database** : Mongodb,MySQL
- **Developmet Tools** : Ionic 4/5 Framework , MEAN stack, Angular 2/4/8, AWS EC2, AWS S3, Nodejs, Express, Mongodb, NPM, PHP, HTML5, CSS3, Bootstrap 4, Adobe Illustrator, Photoshop, Git, WordPress
- **Operating Systems** : Windows, Linux, MacOs
- **Development**
- **Environments** : Sublime, Visual Code Editor, Xcode
- **Others** : JSON, Data Binding, REST Api, MVC framework, English Typing(40WPM), Microsoft word, Excel, Powerpoint

Professional Experience

Pawzeeble Infosol Pvt Ltd (Full Stack developer) Jan 2020 –till date

- Environment: Ionic Android/IOS development Platform and framework, MEAN Stack
- Contributed to the full Android/IOS application development lifecycle from planning, requirement gathering, development, testing and deployment with the help of Hybrid crossplatform framework Ionic 4/5.
- Contributed to the full Web application development lifecycle from planning, requirement gathering, development, testing and deployment with the help of Angular, nodejs, mongodb and express(MEAN stack)
- Worked on a Android and Ios application **Pawzeeble Adoption** where pet owners and pet lovers can adopt a pet and put for adoption. Integrated city wise pet filtering with google map api integration for location tracing. Integrated chat system by using Socket.io so that pet owners and pet adopters can chat with each other as per user friendly purposes. Integrated Social(google and facebook login) and Email login for the application with auth guards. Managed to deploy the app on Playstore(Android) and AppStore(IOS). **Application Link(Android)** - https://play.google.com/store/apps/details?id=com.pawzeeble&hl=en_IN **Application Link(IOS)** - https://apps.apple.com/in/app/pawzeeble/id1489732501
- Working on the **second phase** of Pawzeeble Adoption that is **Pawzeeble Social(80% completed)** which is a social platform where pet lovers and owners can post images/videos, stories etc. Also users can create **Events** for the pet which can expire as per the end date of the event. Users can also post from there pet account also can tag others in post and event. Integrated notification like instagram for post like etc. Also users can comment on the post and reply and like to the comments. Integrated the RESTful Api with the help of Nodejs, Express and Mongodb as database. Deployed both the projects on AWS
- Working on the Moods module of the **Pawzeeble Social** users can create filters. Also post stories with integrated emojis and signature pad to write on the captured story.
- Done a side project to learn Google fireBase of social platform with signup and login with firebase. User can upload photo and caption and profile edit.

hIOTron(Front End UI/UX developer) Jul 2019 – Dec 2019

- Environment: NPM, Ionic Android/IOS development Platform and framework
- Contributed to the full Web application development lifecycle from planning, requirement gathering, development, testing with the help of Angular, nodejs, mongodb and express(MEAN stack)
- Contributed to the full Android/IOS application development lifecycle with the help of Hybrid crossplatform framework Ionic 4
- Working on a Vending machine(IOT enabled Vending Machine) project that runs on Android platform
- Integrated the whole Inventory part for the project from UI to the API calls all done using Angular 5, nodejs, and Mongodb as the database
- Also managed to push the code and the updates to the main server(AWS)
- Integrated the Business App(Android/IOS) for the Vending Machine where the customer can view all the live data regarding his Machine Eg.(How many cups were sold today, and the level of beverage powder remaining in the canister etc)
- **Application Link -** https://play.google.com/store/apps/details?id=com.cherise.business&hl=en
- Contributed to representing the real time data and analytics comming from all the sensors included in the Vending Machine
- Integrated all the API calls required to run the Inventory project and also designed the backend Schema(Mongodb database) so as to store the data
- Fixed bugs with code, design patterns and miscellaneous during projects
- Contributed to the full Android/IOS application development lifecycle of the Disaster Mitigation project where the role was to represent the data through sensors placed in different parts of an area and to calculate the impacted users among all the users registed to the app. Also Manage to show live data comming from the sensors

Plainsurf Solutions Pvt. Ltd. Jan 2019- Jul 2019

- Contributed and worked as an intern for the company by designing and deploying the company website using WordPress and Php
- Integrated file convertor project where the Json file format can be converted to excel sheets using Php and codeignitor framework
- Studied and implemented the MVC architecture
- Developed the College Management Project using LAMP stack(Linux Apache Mysql Php) and AWS as server where the student details and fees where managed by the admin login also the teachers details and salary details were managed too

EDUCATION

- **B.E. (Computer Science)(2019)**- 7.3 CGPA from Vishwabharti Acadamy's College of Engineering, Ahmednagar (Pune University)
- **HSC(2015)**- 65.85% from AES Ashokbhau firodia English medium school and Junior College, Ahmednagar
